

CERTIFICATE OF ACHIEVEMENT

This certificate is awarded to

Natalia Kniazeva

for successful completion of

Data Analytics

OUTLINE:

In this course, students learn how to use data make predictions and insights. Students work with a variety of Python libraries to transform, analyse, manipulate, visualise, and interpret real-world data. The course takes place twice a week where industry experts support the students in their learning journey through practical knowledge and hands-on exercises.

CONTENTS:

- Basic statistics
- Exploratory data analysis
- Data visualisation
- Linear regression
- Simple machine learning models

This course was held for a period of 48 hours from 09/03/2026 to 10/06/2026.

This **Certificate of Achievement** is awarded in recognition of the student's successful completion of all learning objectives. Through assignments and/or a final project, the student has demonstrated the knowledge and skills required to meet the course expectations.

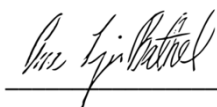

Certification Levels

Achievement with Honours: Exceeded all objectives with excellence.

Achievement: Met all objectives successfully.

Participation: Attended and engaged in sessions.
